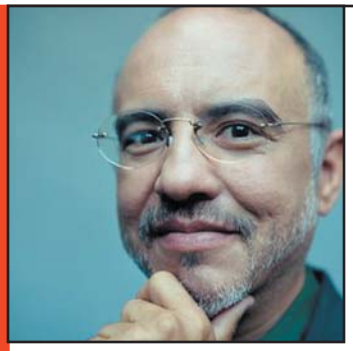
ENGINEERING.COM™
CATIA EDUCATION CENTER

Business Partner

CATIA is one of the most comprehensive, widely used engineering tools in the industry used by thousands of companies around the world. These companies want users that are comfortable with today's most advanced design tools. Specifically, they want engineers, designers and CAD operators that are adept at using CATIA.



RESOURCES FOR EDUCATORS

Give your students the power to imagine the impossible. To take ground-breaking ideas and turn them into next generation devices of every kind, from cars and planes to hand-helds and molded parts. The CATIA Education Version is an incredible tool that will prepare your students for a brilliant career.

EDUCATION VERSION PROVIDES COMPLETE DESIGN FUNCTIONALITY FROM CONCEPT TO PRODUCTION WITH OVER 100 CATIA MODULES, INCLUDING:

- High End Styling and Mechanical Surface Design
- 3D/2D Generative Design with a full Knowledgeware
- Integration and engineering capabilities for Analyzing Parts and Assemblies.
- Collaboration
- Real Time Rendering
- Data Exchange
- Electrical Systems and more

CATIA IS THE DE-FACTO STANDARD IN AUTOMOTIVE AND AEROSPACE DESIGN, TWO OF THE MOST DEMANDING APPLICATIONS IN THE WORLD.

CATIA Education Version

CATIA Student Version

EDUCATIONAL TOOLS FOR STUDENTS

The CATIA Student Version provides the tools needed to perform 3D part and assembly design and the generation of production drawings. In addition, it includes integrated real time rendering capabilities and supports data exchange using common industry standards.

Available to students of registered CATIA education institutions only.
